

MBRN-VB

Effective range:

Size range: 50-185 mm² (Ø 9-20 mm) bare Alu or Cu cables.

Thickness: 3 mm continuously

Material: UV and acid resistant, reusable PVC.

Versatile usage:

For regular (straight) and irregular cable routes and for any cable material and/or form.

Installation:

The cover can be installed manually or with special tool on the cables. After installation, make sure that the outer shell of the cover fits perfectly onto the lower shell.

The cover should be fixed at both end points, and also per each 1 m.

The cover can be removed manually or with special tool, if necessary.

Due to the fast installation, the durable design and the high level of electrical safety, the MVB cable cover is an ideal solution for the bird-friendly modification of the bare cables, and can be used as elongation element for the MBRN-E bird protection cover or individually for any cable covering need, like connections at tension poles.

Material:

Description	Appl. area	ShoreA hardness	Density (g/cm ³)	Tensile strength (N/mm ²)	Elongation at rupture (%)	Heat stability at 200 °C min.	MFI (190 °C, 21,6 kg)	Stabilising system
FL-462 black	Soft PVC	62-64	1,21	10	366	31	45	Ca/Zn
